We have a range of products to help with

**COW
 HEALTH & WELFARE**

to get the best
 productivity from your
 herd

DairyLight's LED light system regulates the Circadian Rhythm and Melatonin Secretion through its unique light spectrum.

Herdvision provides real-time data on the health and nutrition of your herd.

Data is delivered directly to your phone or tablet - supporting your daily management decisions.

Real-time and reliable identification of changes in lameness and BCS allow for early intervention, before these changes impact cow performance and welfare.

Nedap COWControl provides a complete cow control, 24/7.

This single system tracks heat status and health condition of all cows on the farm and provides ISO identification for management purposes.
