Dairy Supplies Ltd

For solutions for calf care, we offer an extensive range of products from Holm & Laue to **save time** and **labour** on calf feeding.

From **Calf Expert**, the automatic calf feeding station to the **Milk Taxi** for easy mixing, transporting and feeding, to calf feed fences, calf buggy and igloos, we have a solutions to suit all farming systems.

HOLM & LAUE

Milk TAXI

Calf EXPERT

The **MilkTaxi** makes bucket feeding easy and enjoyable. The mobile milk tank enables individual calf feeding through pen recognition, flexible feeding curves and Dry Matter calculation.

With four stable wheels it is smooth for transporting milk to calves.

Save time and labour

Save on feed costs

Smart-Mix only requires the desired milk replacer concentration and scoop size once. It then specifies the water quantity and weight of powder.

With 9 freely programmable dosing levels, you can dispense almost any feed quantity.

CalfExpert uses state-of-the-art feeding technology ensures that the milk for the calves is always freshly mixed. It does not matter whether milk replacer or pasteurised whole milk is used.

CalfExpert prepares the milk automatically and individually for each animal.

Different feeding programmes form the basis of successful and performance-oriented calf rearing in automatic calf feeding.
